

Adobe Acrobat Sign x Microsoft.

How e-signatures and Microsoft work together to deliver more speed, more efficiency, and time saved.

Winning with digital workflows.

Work has changed. It's no longer a place. It happens wherever companies get things done—the office, the home, the coffee shop, and everywhere in between. But the nature of what we do remains the same. Contracts need to be signed, new employees need to be onboarded, multi-tool collaboration is still imperative.

In an all-digital, remote, and hybrid world, the companies who can make work happen faster, more efficiently, and with less friction will ultimately win.

But simply providing employees and customers with the right tools isn't enough. They expect a better experience—and rightfully so. Nobody wants to switch between apps. Juggling different solutions leads to less productivity and greater frustration. Today, companies need to do more than create digital workflows. They need to draw more power and productivity from them by integrating them into the tools they already use every single day.

By making the e-signature capabilities businesses rely on work right inside the Microsoft applications they're familiar with, organizations aren't just getting more done—they're doing it more efficiently and delivering a better experience in the process.

Here's how organizations of all sizes are using [Adobe Acrobat Sign x Microsoft integrations](#) to keep work moving—and how you can too.

1 Sign the dotted line to get more done.

Acrobat Sign and Microsoft are built for all types of work and all kinds of companies.

Contracts get signed, people get onboarded, and deals get done at the speed of e-signing. Without them, business stops. With the right e-signature solution in place, however, organizations save time and money.

Acrobat Sign checks all the boxes for every organization.

Acrobat Sign isn't just powerful. It's practical. That's because it's an e-signature solution that works across your entire organization with the peace of mind and ease of use you need.

Each department.

Whether it's sales, HR, legal, or any other department, e-signatures can make your entire organization run more efficiently by powering cross-team collaboration, document tracking, requests for approval, and asset creation.

Any device.

Being able to sign documents electronically is one thing. Being able to do it anywhere on any device—that's game-changing. Today, employees and customers want a simple, one-click signing experience on their computer, phone, or tablet no matter where they're working from.

Every security and compliance need.

Security and privacy practices are under increasing legal scrutiny, and it's up to businesses to stay ahead of changing laws. With Adobe and Microsoft's world-class compliance measures, you can be assured that all your bases are covered.

With enterprise-level security practices for identity management, data confidentiality, and document integrity that protects your data and personal information, you can rest easy while you work efficiently.

30% increase

in transaction speed

25% reduction

in e-signature solution costs

2 Take your digital workflows one step further.

And make them two steps easier.

With video calls, documents, spreadsheets, and more, chances are your teams are already using Microsoft tools to get their jobs done every day. By integrating Acrobat Sign directly into those tools, your digital workflows work better. Now you can collect e-signatures and increase productivity without having to juggle multiple apps—or even leave the one you're already working in.

The e-signatures capabilities you need. Right inside the tools you already use.

As Microsoft's preferred e-signature solution, Acrobat Sign is designed to work directly within apps like Outlook, Word, and Teams to deliver immediate timesaving, productivity-enhancing results across your entire organization.

Now you can do more than ever, easier than ever.

Fast, easy setup.

Integrating Acrobat Sign and Microsoft doesn't require installing additional software. Just download the add-ins and go.

Track all your signatures.

Get real-time visibility into signature status, so you always know exactly where your documents are in the process.

Built-in compliance.

With an integrated e-signature solution, you automatically reduce costly legal and compliance risks.

Approvals at your fingertips.

Acrobat Sign is embedded into your Approvals app, so you can add secure e-signatures quickly and easily.

In-person signing.

With Live Sign features, you can e-sign documents face-to-face—an ideal solution when you need an in-person signing experience.

3 Double the benefits. Half the effort.

With Acrobat Sign and Microsoft working together, organizations are saving millions of dollars and thousands of hours.

47%

efficiency gains in back-office work

519% ROI

over three years

\$9.2 million

transaction time savings over three years

4 One powerful solution for all the ways you work.

Put Adobe and Microsoft to work across all your departments.

In addition to the live signing feature, Acrobat Sign and Microsoft deliver real, time-saving, productivity-boosting benefits across every department. Here are a few of the ways everyone from HR and legal to procurement and sales are putting them to work.

HR
