

What is Managed Business Services (MBS)?

- Assess your business environment
- Propose and implement technology solutions
- Manage these solutions as a service over a financed contract period
- Manage costs through one service provider and one invoice

In some cases, **80%** of IT budgets and efforts go toward simply keeping things on the rails.

With MBS this cost is minimised because an expert provider with insights and interest in your business, can manage these matters for you to save you time and money.

- MBS helps you gain access to the latest and most suitable technology solutions.
- It helps you decide what really matters in your company's technology to enable efficient operations.
- Sign one packaged service contract for your hardware, software and service solutions.

What are the MBS pillars?

COMMUNICATIONS

You can have access to all the tools of communication you need, including PABX, mobile, video conferencing, data calling... whatever works for your business to get the message across.

SECURITY

It's best to integrate security into every part of your business. You become more aware of employee activities and have a solid operational awareness of your technology. You can also become better prepared for disaster recovery, so that there's business continuity.

DOCUMENT MANAGEMENT

Your company cloud-based services can seamlessly be integrated with your in-house ERP systems, saving you a lot of time and money. You can have all the benefits of systems that can talk to each other, without changing what you already have.

CLOUD

Have your business applications and software on the cloud. Everything in the cloud is connected, you can securely cross reference and share information across different applications.

MOBILITY

Nowadays, business happens on the move. Use mobile technology so you can do your business best.
