

ThousandEyes is a network assurance platform that offers **comprehensive visibility** for any network, from the Internet to critical SaaS services, and from data centers to the cloud. It integrates monitoring and visualization of **device health**, **network paths**, and **internal hosted** and **cloud application performance**. It provides proactive visibility, enabling quick troubleshooting and detecting issues to deliver exceptional digital experiences. Sintrex now offers consumption-based pricing through the **Cisco Managed Services License Agreement**.

→ **Network & Application Synthetics**

→ See how every network and service impacts your enterprise digital experience.

→ **End User Monitoring**

→ Assure network performance and web app experience from employee devices.

→ **Internal Insights**

→ Understand how service provider outages impact the applications and networks your business relies on.

→ **WAN Insights**

→ Optimize SD-WAN policies proactively for seamless application experiences and efficient IT Operations.

- Subscription Service: Without imposing minimum quantity requirements
- Optimise Solutions: Design, architecture & planning expertise
- Monitor & Alert: Configure ThousandEyes tests & escalation procedures
- Actionable Insights: Reporting & expert analysis
- Manage Everything: Systems, subscriptions & vendor support
