Manage your Cloud Migrations

Moving to the cloud does not have to be an unknown, we can provide in depth analysis of potential costs and options available to you, we can also estimate the migration effort costs to support your decision. We will also estimate potential funding availible

Bytes AWS can provide deep dive assessments for customers in scope to migrate to the Cloud. Following the assessment typically in the form of a funded Well Archietcted Review or funded Migration Assessment, our architects will be in a position to advise on potential costs within AWS and the procurement options available to make savings. We will also be able to estimate total funding from AWS for the migration of the project – which in some cases can cover all or a high percentage the migration costs.

The Software Tooling Platform we use supports the entire cloud journey mapping...

From initial cloud assessment and migration mapping application dependencies and providing guidance on work load move groups. We are able to give customers a future look into what their Cloud will look like.

DELIVER PREDICTABLE OUTCOMES

PLAN

Move applications with clear visibility of what it will look like when you are there

Accurate dependency management planning drives accelerated timescales and lower migration costs.

ACCELERATE CLOUD ADOPTION

Discovery & Mobilise

Simplify the creation of cloud-native applications and infrastructure.

Enable quicker time to implementation using proven methodologies to disover and mobilise the migration

Manage your cloud with confidence and predictability

We use powerful tooling and AWS best practice methodologies when migrating workloads.

Accelerate cloud adoption & migration

Get to the cloud faster.
Powerful automation improves the ease, speed and accuracy of moving to the cloud, so you can accelerate cloud adoption and migration.

Achieve cost clarity & control

Control spend and achieve cost-performance optimisation. Gain insight into applications' cloud spend and automate control over cloud costs to ensure you always have the optimised cloud.

Make data-driven decisions with ease and confidence

Know you're making the best decisions for your business.
In-depth, high-precision analytics simplify the cloud and bring you peace of mind that you're making the best, most accurate decisions throughout the entire cloud journey.

Assess

The aim of this phase is to gain a clearer picture of the existing estate and business requirements/motivations in order to help build a business case and provide a TCO analysis

Discovery & Mobilise

This phase allows us to validate our customers readiness to performing the migration, we look at dependancy analysis and talking to key stakeholders to build a detailed migration plan.

Migrate

This phase is often broken down into manageable "waves" where we break the project down to minimise disruption and risk.

Optimise & Modernise

We use Cloud Health tooling to ensure you are only every spending what you need to and optimise wherver possible, we also will discuss mordernisation options.
